

Ahesan Chowdhury

Software Engineer | Java Backend Developer

Bengaluru, Karnataka, India · +91 97495 95125 · ahesanchowdhury@gmail.com
linkedin.com/in/ahesan-chowdhury-44a8202aa · github.com/itsAhesan

PROFESSIONAL SUMMARY

Software Engineer with close to two years of experience building Java backend systems, currently working full-time on a client e-commerce platform. Builds REST APIs with Spring Boot and Spring MVC, models relational schemas, and works across the persistence layer with Spring Data JPA and Hibernate on MySQL. Comfortable across the full SDLC in an Agile team, from requirement gathering and proof-of-concept work through code review, CI/CD and production support.

TECHNICAL SKILLS

Languages Java (8, 17), SQL, JavaScript, HTML5, CSS3

Frameworks Spring Boot, Spring MVC, Spring Data JPA, Spring ORM, Spring WebSocket, Hibernate, J2EE, JSP/JSTL, Hibernate Validator

Architecture REST APIs, RESTful web services, Microservices, MVC, layered architecture (Controller/Service/Repository/DTO), OOP, design patterns (Factory, Singleton)

Databases MySQL, JDBC, schema design and normalization, indexing, joins, query optimization

Cloud & DevOps AWS S3, CI/CD pipelines, Git, GitHub, Maven, Apache Tomcat

Testing & Tools Postman, Swagger/OpenAPI, Jira, Slack, Lombok, Jackson, Apache POI, PDFBox

Frontend React, JavaScript, Bootstrap, HTML, CSS

Practices Agile/Scrum, SDLC, code review, technical documentation, production support

PROFESSIONAL EXPERIENCE

Software Engineer

Trigent Software - Professional Services · Bengaluru, India | March 2026 - Present

- Contribute across the full SDLC of a client e-commerce application - requirement gathering, design, analysis, development and production support - as part of a 6-member Agile Scrum team.
- Designed the relational database schema for the e-commerce platform, defining entity relationships and constraints across catalogue, order and customer data.
- Build and maintain the backend persistence layer using Spring Data JPA, implementing repository interfaces and custom queries over the application's core entities.
- Deliver proof-of-concept implementations for new requirements and carry the accepted approaches through to the production codebase.
- Work across the stack on backend services and frontend integration, enforcing coding conventions and maintaining technical documentation for handover and support.
- Contribute to the CI/CD pipeline for continuous integration and automated deployment.

Software Engineer Intern

X-workZ ODC · Bengaluru, India | April 2025 - February 2026

- Built and tested RESTful endpoints with Spring Boot, applying Hibernate Validator request validation and centralized custom exception handling for consistent API error responses.
- Designed normalized relational schemas and optimized SQL queries using joins, indexing and grouping to reduce query execution time on reporting workloads.
- Developed the Happy Cow dairy management system end to end in Spring MVC and Hibernate - role-based admin and agent dashboards, OTP-based password reset, account locking, and real-time payment notifications over Spring WebSocket.
- Applied Java 8 Streams, Lambdas and Optional to write null-safe data-processing logic, reducing boilerplate and null-pointer defects in business-rule code.
- Built reusable utility classes and DTO mappers using OOP principles and the Factory and Singleton patterns, standardizing entity-to-response conversion across services.

Full-stack Developer Intern

AJARK IT Solutions Pvt Ltd · Hyderabad, India (Remote) | October 2024 - April 2025

- Developed and maintained RESTful APIs in Spring Boot, handling request validation, service-layer business logic and MySQL persistence through JPA/Hibernate.

- Integrated AWS S3 for secure file upload, storage and retrieval within backend services, including progress-tracked uploads and downloads.
- Built UI components with HTML, CSS, JavaScript and React, wiring them to backend REST endpoints for end-to-end feature delivery.
- Worked in an Agile team using Jira for task tracking and Slack for collaboration, participating in code reviews and deployments; tested APIs with Postman and managed builds with Maven.

PROJECTS

Happy Cow - Dairy Management System

Java, Spring MVC, Hibernate, MySQL, Spring WebSocket, JSP/JSTL, Maven, Tomcat, Swagger

github.com/itsAhesan/happy-cow

- Enterprise-style dairy operations platform with separate admin and agent dashboards, role-based access control, milk collection tracking, and bi-monthly payment window processing.
- Implemented secure authentication with account locking after failed attempts, OTP-based password reset over email, and a full audit trail across all entities.
- Added real-time payment notifications via Spring WebSocket, Excel import/export with Apache POI, PDF invoice generation with PDFBox, and QR code generation with ZXing.
- Structured the codebase in a clean layered architecture - Controller, Service, Repository, Entity and DTO - with REST APIs documented in Swagger.

Video Manager - Cloud Video Upload Service

Java 17, Spring Boot 3.3.5, AWS S3, React, Vite, Axios, Bootstrap

github.com/itsAhesan/video-upload-application

- Full-stack application for uploading, streaming, downloading and deleting videos, backed by AWS S3 object storage.
- Built the Spring Boot REST backend for S3 integration and a React frontend with real-time progress bars for long-running upload and download operations.

EDUCATION

Bachelor of Science (B.Sc)

University of North Bengal (NBU) | 2020 - 2024 | CGPA: 7.3

Higher Secondary (Class XII)

New Jalpaiguri Railway Colony High School | 2018 - 2020 | 71%

LANGUAGES

English (Fluent), Hindi (Fluent), Bengali (Fluent)
